

## CHILDREN'S TREAT TO BE HELD AT ROYAL

Management Gives Theater  
and Moving Pictures to  
Elks' Committee

Children of Bisbee will have their Christmas entertainment, which is planned by the local lodge of Elks at the Royal theatre this year. It was announced yesterday by the committee which has the matter in charge that the management of the Royal has kindly offered the use of the theatre for Tuesday afternoon, December 24 and had even gone further and agreed to furnish the picture program without cost to the order. The management has further informed the committee that they will arrange a special feature program which will be of especial interest to children for this occasion. They have entered with a will into the Christmas spirit which the Elks have undertaken to arouse.

Besides the picture program the committee will arrange other numbers which will be later announced and the young folk will have an entertainment which they will carry with them for days to come in memory.

Other committees which have the entertainment in charge announce that so far as possible the toys, candies and nuts will be purchased at home. Where so many toys have to be bought and all of one particular kind should be exactly alike this is sometimes difficult but where it can be done the committee will this year make such arrangement.

Invitations to the children of the various congregations will be extended in the various churches Sunday and during the week cards will be distributed through the schools and the charity bureau that will bring good cheer to the poorer children of the city.

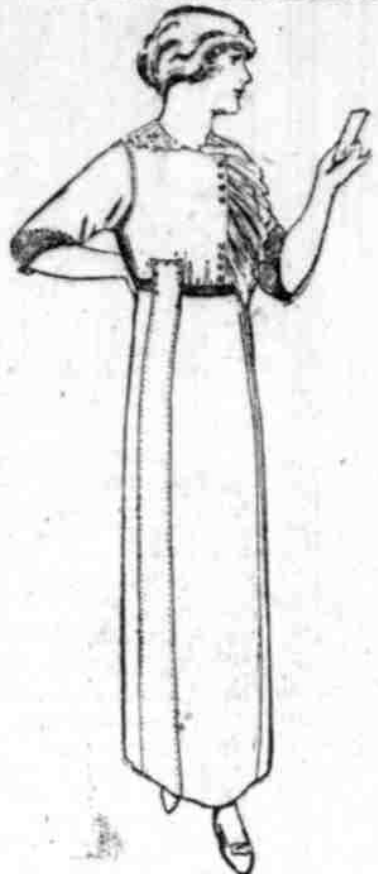

### Tragedy in Bird Migration.

Very many of the birds that start for the south never reach it. Not the least of the dangers on the way is the encountering of the dazzling electric lights, tall buildings, telephone and telegraph wires, and other obstructions in the cities, especially on cloudy nights when the light is low. At such times the morning reveals the tragedies of the night, when little bruised bodies lying here and there in the streets tell of the havoc wrought. Terrible sufferers in this respect are the warblers. Also countless thousands of migrating birds have perished miserably by being blown out to sea by adverse gales; and blizzards and unusually severe snowstorms have claimed unnumbered victims.—H. M. Laing in the Outing Magazine.

### Truth in Old Age.

In children the training of the senses, so necessary, is for the most part unconscious and self-adjusted, as in games, yet the science of psychology has invented tests to aid such training of the senses. There seems to be a lot of truth in the old saying: "Do not believe all you see, nor half you hear."

## GRACEFUL FROCK OF CREPE DE CHINE

Here is a graceful frock of bronze-colored crepe de chine with trimmings of self-toned bengaline and collar of deep ecru lace with side frill in a matching shade of fine net. The sleeves are set in large stitched armholes. The model, in 16-year size, requires 2-4 yards of 48-inch material, or 4-4 yards of 36-inch material; 11-8 yards of 27-inch silk; 1-2 yard of net frilling.

## GUARDING AGAINST CHRISTMAS RUSH

Postmaster Announces His  
Plans for Facilitating  
Business

In order to keep the rush of Christmas work at the postoffice down as much as possible, Postmaster Cassidy has decided to allow the holders of post boxes to pay their rent on the boxes on or before Dec. 20, when the rent is due. Dec. 20th is also payday and as it is only five days before Christmas, it is believed that the two day days would make a congestion of work. For this reason the post office will receive the rental on post boxes from Dec. 17 to Dec. 20.

Mr. Cassidy is making every effort to make the Christmas mail rush as small as possible. It is requested that Bismarck get their mail off as soon as possible. Besides being a great help to the post office this will also insure the delivery of the mail on time. Already the Christmas rush is beginning to be felt. Since Monday heavy consignments of mail for foreign countries have been received, but it is not expected that the big "home mail" rush will arrive until next week.

## BISBEE PEOPLE NOW IN CONTROL

Local Parties Buy Controlling  
Interest in Common-  
wealth Extension Com-  
pany at Pearce

### PROMISING PROPERTY

The Commonwealth Extension Mining company, organized last year by John Pearce, of Tombstone and owning the property adjoining the Commonwealth mine at Pearce, has passed to the control of a number of parties in Bisbee, who recently associated themselves together for the purpose of taking over the controlling stock.

The action means that the property is to be put into action just as soon as preparations for beginning work can be made.

Under the new control Parker Woodman, now of Phoenix, but long the superintendent of the Copper Queen mines in the Warren district, becomes president of the company. Dr. F. E. Shine, vice president. Among the new stockholders who reside in Bisbee are Jack Williams, Gus Hickey, Bob Hennesey, Johnny Bowen and others.

Mr. Woodman will soon return to this county for the purpose of taking personal management of this property and development is expected to begin early in the spring of next year.

The claims owned by the Commonwealth Extension were located by John Pearce at the time he discovered the Commonwealth mine. He retained these claims, but never done any work on them until last year. He discovered some splendid ore which has been partially developed and is confident that the Commonwealth vein of gold and silver which yielded such enormous profits to the Commonwealth company passes through the Commonwealth Extension claims.

John S. Williams stated yesterday evening that he was confident that the new company will not be long in seeing this new property become one of the rich producers of Cochise county and in every way equal to the old Commonwealth property. Mr. Williams returned yesterday morning from Tombstone where the final papers transferring the stock to the new owners were duly executed.

Boston Globe  
The new company will not be long in seeing this new property become one of the rich producers of Cochise county and in every way equal to the old Commonwealth property. Mr. Williams returned yesterday morning from Tombstone where the final papers transferring the stock to the new owners were duly executed.

### Physical Impossibility.

A young Englishman came to Washington and devoted his days and nights to an earnest endeavor to drink all the Scotch whisky there was. He couldn't do it, and presently he went to a doctor complaining of a disordered stomach. "Get drinking," ordered the doctor. "But, my dear sir, I can't. I get so thirsty." "Well," said the doctor, "whenver you are thirsty, eat an apple instead of taking a drink." The Englishman paid his fee and left. He met a friend to whom he told his experience. "Bally rot," he protested. "Fawny eating an apple a day."—Saturday Evening Post.

### Case in Doubt.

Ex-Governor Pennypacker, discussing the divorce suit in Philadelphia, said with a smile: "In these times one never, as the saying goes, knows where one is at. An acquaintance of mine extended his hand to me at the Historical society the other day and cried: 'Congratulations, I am the happiest man alive!' Looked at him doubtfully. 'Engaged, married, or divorced?' I asked."

## MINING & RAILROADS

## CAPT. HOATSON HEAVY SELLING MAN OF VALUE AGAIN FEATURE

Gives Up Presidency of  
North Butte to Avoid Of-  
ficial Attention Re-  
quired by Property

### MADE GOOD IN MINES

The retirement of Captain James Hoatson from the presidency of North Butte company was long ago desired by the captain but his associates did not wish him to give up the position. He remained long enough to prove his contention that the mine, after passing through a lean ore formation would again come into good copper ground, a prediction that has come true. North Butte being thus established as a permanent producer, the captain insisted on being relieved of the responsibility and labor connected with the presidency, a course the directors, including the new president, Mr. T. F. Cole, very much disapproved to concede. Capt. Hoatson will still be important in giving expert opinion on the work of the property, however, he still being well able to serve in this capacity. What he wanted to get away from was the official attention he felt was demanded.

Capt. Hoatson is an active man, and his heart is still full of this copper mining business. He loves it, and he will still be found going through the levels of the various properties in which he is interested and helping to direct mining work in the days when he was devoting all his time to his vocation.

We need to meet Capt. Hoatson in the Bisbee mines of Calumet & Arizona and its associate properties. With a pick in hand he would often run across all by himself in some portion of the mine, taking samples of the rock, or ore, and putting himself at the ground actually was. He is one of the best judges of copper ground, native or ore, to be found anywhere, and he had a rare experience as a practical miner in both the Michigan and western fields, and his judgment has been constantly sought for many years by those desiring intelligent opinions of properties under consideration as well as those being actively worked.

Capt. Hoatson has done much for those with who he was closely associated in the days when he was active in the mines of Lake Superior and Butte. He has shared his successes with them with a most liberal hand. It was largely through his personal efforts that the value of the Calumet & Arizona properties was brought out. It was upon his judgment that the hands embraced in the original development company were secured, and from which modest beginning a great achievement has resulted, that in the near future is to take on still more important proportions. His kind personality and his keen discernment in mineral formations has made him a great favorite with the many mining men who know him.

As we say, Captain Hoatson will still be heard of in connection with successful mining enterprises because it will be impossible for him to keep away from them.—Iron Ore.

The Spinster.  
Marriage is a delightful thing; but it is not, and never can be, a duty; nor is it as a duty that men and women have hitherto zealously practiced it.—Agnes Repplier, Litt. D.

Tight Money and Extensive  
Calling of Loans Respon-  
sible for This Condition  
—The Coppers

### SITUATION IS CRITICAL

BOSTON, Dec. 11.—Tight money and extensive calling of loans was responsible for further heavy selling in New York market today. Steel, Union Pacific and Reading were the chief sufferers, Union breaking six or seven points with only a feeble rally at the close. Steel held better and received better support than others and closed with no losses for the day. The forced selling of the local coppers seems to have been done mostly yesterday and the selling today came mostly from traders who were trying to force further liquidation and reaction. The copper metal demand continued good and many people were picking up bargains in copper stocks who have not been in the market for a year. We think the situation is critical for weak margined accounts but cash purchasers of the good coppers on a scale down from these prices cannot fail to show big profits. The coppers which we feel sure of are Grand, Copper Range, C. & A. Old Dominion, Allouez, East Butte and Shannon. Buyers of these stocks at present prices need have no fear of any unfavorable developments at the property.
